PROFILE

I have become a front-end developer with an industrial and mechanical professional background. From this experience I can transfer my knowledge of working in a small team, encounter, and repair machine errors all with precision and responsibility. At mimo_dev I learned the fundamentals of writing dry code, handling and using the developer tools, and most importantly breaking down problems to the essentials. Furthermore I was also able to strengthen my foundation in team collaboration and communication and to plan projects effectively. I am proficient in an assortment of technologies, including HTML, CSS, JavaScript, Bootstrap, React, MySQL, Node.js, and Git.
